PROFESSIONAL SUMMARY

Senior Automation QA Engineer (SDET) with almost 6 years progressive growth. Expert in test automation frameworks achieving 60% coverage increase, 75% regression time reduction, and 45% MTTR improvement. Demonstrated expertise in compliance architecture, microservices testing, and leading technical teams while delivering zero production-impacting defects.

TECHNICAL SKILLS

Automation: JavaScript, TypeScript, Playwright, Jest, Cypress, **NX Test Monorepo**, TDD

API: RESTful, Schema Validation, Insomnia

Testing: Functional, Integration, E2E, Regression, Performance, Load, Security, Manual

Mobile: Android, iOS, NFC Testing

DevOps: CI/CD, Git, **Claude API**, Slack, Jira, Linear, Notion

Domain & Expertise: Merchant Systems, **Payments**, **Terminal Systems**, Microservices Architecture, **Agile/Scrum**, Test Strategy, Test Planning, Defect Management, **Leadership**

EXPERIENCE

SURFBOARD PAYMENTS, CHENNAI | Feb 2021 – Present (5.6+ years)

• Senior Member of Technical Staff

Mar 2026 – Present

- Led test automation strategy for multi-service payment platform (100+ microservices, 1000+ endpoints); 60% coverage increase, 75% regression time reduction
- Developed AI-powered automation agent (Claude API) executing tests autonomously with Slack notifications; 45% MTTR reduction

• Senior Software Engineer - QA & Test Automation

Mar 2024 – Mar 2026

- Architected scalable NX Monorepo test infrastructure enabling 5+ teams to adopt automation with minimal onboarding
- Established compliance architecture governance validating security controls, data protection, regulatory compliance with zero violations
- Implemented **pre/post-deployment testing** for payment terminals and card types with zero production defects
- Built schema-mismatch detection resolving 25+ mismatches, preventing 100+ bugs. Improved test discoverability 70%; onboarding 2 weeks→3 days

• Software Engineer - QA & Test Automation

Jul 2021 – Mar 2024

- Mentored 2+ interns in test automation, API testing, SDLC practices; improved skills resulting in successful contributions
- Designed comprehensive API/E2E automation framework supporting 100+ microservices (1000+ endpoints); architected NX Monorepo for cross-service testing
- Built automated E2E coverage for Terminal Management System (70+ scenarios, 95% coverage); extended merchant automation for multi-merchant flows

• Software Engineer Trainee - QA & Testing

Feb 2021 – Jul 2021

- Built foundational QA expertise in test planning, manual testing, defect tracking, documentation
- Conducted QA for LendHope platform (2 dashboards, mobile app); functional/integration testing for 5,000+ learners; cross-device Android/iOS testing

PROFESSIONAL DEVELOPMENT

- Agile/Scrum expert with cross-functional collaboration and established expertise in AI-powered test automation. Advanced proficiency in SDLC, QA best practices, test strategy, defect management, and compliance architecture.

EDUCATION

B.E. Computer Science and Engineering

Aug 2016 – Apr 2020
